IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: Kenneth Stewart

Serial No.: 10/634,368

Filed: August 6, 2003

For: Bone Instrument Cover or Shield

Art Unit: 3736

Commissioner for Patents  
P. O. Box 1450  
Alexandria, Virginia 22313-1450

October 16, 2005

Change of Address

The following address should be entered into your records for correspondence  
with applicant's attorney,

Evelyn M. Sommer

250 Park Avenue, Suite 825

New York, NY 10022

This is the second such change of address form which has been filed. The last  
dated 1/27/05 (see enclosed) has been ignored as the patent was published March 3, 2005  
with the attorney's former address.

Again, please correct your address.

Respectfully Submitted

*Evelyn M. Sommer*

(57) ABSTRACT

A bone instrumentation cover or shield has a hollow cap or casing for encapsulating projecting parts of instrumentation installed in a bone, and a fastener portion provided at a lower edge of the cap or casing for securing it to the bone or to parts of the instrumentation where it is installed in the bone. The instrumentation shield or cover is designed to provide a medically-safe physical barrier for implantation between projecting parts of bone instrumentation constructs and surrounding bone and soft tissues, in order to minimize local irritation or injury and also serve as a barrier to ingrowth from bone and/or fibrous tissues. The shield or cover can be formed in a variety of forms, from rigid casing, to semi-pliable sheath-like structure, to soft pouch or cinch sack. The cap or casing is readily applied over the instrumentation, then cinched, tied or fastened to the instrumentation or adjacent areas, using a locking toothed edge, suture ties, suture strings, drawstrings and the like. The cover is made of medically safe material, and can come in various sizes or constructed to be pliable, stretchable, or adaptable with slideable, displaceable or pleated panels.
